

SKILLORA

AI Powered Applicant Tracking and Candidate Ranking System

Project Overview

Skillora is an AI-powered recruitment platform designed to simplify hiring for recruiters and job applications for candidates. It includes Recruiter, Candidate and Admin modules with AI-based ATS scoring and candidate ranking.

Theme

Dark Black background, Sky Blue accents and White text. Modern professional recruitment platform UI.

Home Page

Contains top recruiters, top candidates, contact section, about section, features section and Login/Signup buttons in the upper-right corner.

Roles

Admin, Recruiter and Candidate.

Recruiter Signup

Name, age, phone number, personal email, company email, company name, company address, company website, industry type, company size, role in company, years of experience, LinkedIn profile, company ID, password and terms acceptance.

Candidate Signup

Full name, email, phone number, password, college, degree, specialization, graduation year, CGPA, skills, experience level, resume PDF, LinkedIn profile, GitHub profile, current location, preferred location and work preference.

Admin Dashboard

Total Candidates, Total Recruiters, Total Job Postings, Applications Submitted, Interviews Scheduled, Hired Candidates and Rejected Candidates.

Resume Analysis

Total resumes uploaded, job categories, ATS score generation and AI-powered ranking within job categories.

User Management

Recruiter management: view profile, complaints, delete accounts. Candidate management: view profile, complaints, suspend accounts and delete accounts.

Recruiter Verification

Admin reviews recruiter details and company information. Recruiters can login only after approval.

Add Opportunities

Admin can create internships, hackathons, competitions, quizzes, challenges and jobs.

Analytics & Reports

Recruiter reports, hiring success rate, candidate source analysis, monthly hiring reports and applications per month.

Feedback & Support

View complaints, resolve tickets, track support requests and feedback analysis.

Notification Center

Send announcements, notify recruiters, notify candidates and manage messages.

Interview Management

View scheduled interviews, monitor status, track outcomes and generate reports.

System Settings

Profile settings and platform configuration settings.

Technology Stack

React.js, Node.js, Express.js, MongoDB, JWT, Multer, AWS S3, Python, TF-IDF, Cosine Similarity, Sentence Transformers, Nodemailer and GitHub.

Skillora - Recruiter Module Complete Specification

Recruiter Dashboard Overview

The Recruiter Dashboard is designed to help recruiters post jobs, discover talent, manage applications, schedule interviews, and make hiring decisions using AI-powered candidate ranking. The dashboard acts as the recruiter's command center.

Dashboard Home

Dashboard cards include: • Total Active Jobs • Total Applications • Shortlisted Candidates • Interviews Scheduled • Hired Candidates • AI Recommendations Count Quick Actions: • Post New Job • Search Candidates • Schedule Interview • View Applications

Recruiter Profile Management

Recruiters can view and edit their profile at any time. They can update company details, contact information, company website, company address, industry type, company size, LinkedIn profile, role in company, and password settings. Recruiters can also manage notification preferences and account settings.

Job Management

Recruiters can create new jobs by entering: Job Title, Job Description, Required Skills, Experience Required, Salary Range, Location, Job Type (Remote/Hybrid/On-site), and Application Deadline. Recruiters can: • Create Jobs • Edit Jobs • View Jobs • Pause Hiring • Close Jobs • Delete Jobs

Application Management

Each job contains application statistics. Example: Frontend Developer 120 Applied 35 AI Shortlisted 15 Interviewed 3 Hired Recruiters can: • View Applications • Filter Candidates • Sort by AI Score • Download Resumes • Reject Candidates • Shortlist Candidates

AI Candidate Ranking

This is the core feature of Skillora. The AI analyzes: • Skills Match • Resume Keywords • Experience • Education • Certifications • Projects Example Ranking: Rank 1 - Harini - AI Score 95 Rank 2 - Rahul - AI Score 91 Rank 3 - Sai - AI Score 88 Additional Features: • Automatic Ranking • Explain Ranking • Skill Gap Analysis • AI Recommendations • Candidate Comparison

Automatic Candidate Selection Logic

After the application deadline is reached, AI automatically evaluates all candidates. Example: Job Openings = 3 Applications Received = 30 Instead of selecting only 3 candidates, the AI prepares a shortlist of approximately 2 times the number of openings. 3 openings → Top 6 candidates shortlisted. The multiplier can be adjusted depending on application count and recruiter settings. This ensures backup candidates are available if some applicants reject interviews or fail screening rounds.

Candidate Search

Recruiters can search candidates using: • Skills • Experience • Location • Education • ATS Score Example Search: Python Machine Learning Hyderabad ATS Score > 80%

Interview Slot Management

Recruiters can open interview slots for a specific date range. The recruiter selects: • Interview Start Date • Interview End Date • Available Time Range • Number of Slots Example: Date Range: July 10 - July 15 Time Range: 10:00 AM - 5:00 PM Once published, shortlisted candidates receive notifications.

Candidate Slot Booking Workflow

When AI shortlists candidates, they receive a notification. The notification contains: • Job Name • Interview Dates • Available Time Slots Candidates can choose a preferred slot from the recruiter-defined schedule. The system prevents duplicate bookings and automatically updates availability.

Interview Management

Recruiters can: • Schedule Interviews • Reschedule Interviews • Cancel Interviews • Send Meeting Links • Track Status Interview Status: • Pending • Scheduled • Completed • Selected • Rejected Recruiters can monitor interview progress and outcomes from a centralized panel.

Analytics Dashboard

Analytics includes: • Applications per Job • Hiring Rate • Top Skills • Candidate Sources • Interview Success Rate • Shortlisting Statistics • Recruitment Trends Charts and visual reports help recruiters make better hiring decisions.

Messaging and Communication

Recruiters can communicate directly with candidates. Features: • Chat with Candidates • Send Updates • Interview Notifications • Selection Notifications • Rejection Notifications • Application Updates

Contact Admin

Recruiters have a dedicated option to contact the Admin. Features: • Raise Complaints • Report Issues • Request Verification Updates • Ask Platform Questions • Submit Support Tickets Recruiters can track the status of their requests until resolution.

Recruiter Workflow

1. Recruiter registers. 2. Admin verifies recruiter. 3. Recruiter logs in. 4. Recruiter creates a job. 5. Candidates apply. 6. AI analyzes resumes. 7. AI generates ATS scores. 8. AI ranks candidates. 9. Recruiter reviews rankings. 10. Recruiter opens interview slots. 11. Candidates book slots. 12. Interviews are conducted. 13. Recruiter marks selected candidates. 14. Analytics and reports are generated.

Skillora - Candidate Module Complete Specification

Candidate Dashboard Overview

The Candidate Dashboard focuses on career growth, job discovery, resume improvement, interview preparation, and application tracking.

Dashboard Home

Dashboard cards include: • ATS Score • Jobs Applied • Interviews Scheduled • Profile Completion Percentage • AI Career Match Score Quick Actions: • Upload Resume • Search Jobs • Update Profile • View AI Recommendations

Profile Management

Candidates can create and maintain a complete professional profile. Personal Details: • Name • Email • Phone Number Education: • College • Degree • CGPA Skills: • Add Skills • Edit Skills • Remove Skills Experience: • Internships • Work Experience Projects: • Project Title • Description • Technologies Used Certifications: • Add Certificates • Manage Certificates

Resume Analyzer AI

After uploading a resume, the AI generates an ATS Score. Example: ATS Score = 87% The system displays: Strengths: • Python • SQL • Projects Missing Skills: • React • Docker Suggestions: • Add measurable achievements • Add certifications • Include technical keywords • Improve project descriptions The AI continuously helps candidates improve resume quality.

AI Job Recommendations

The system recommends jobs using AI. Example: Software Developer - Match Score 95% Data Analyst - Match Score 91% AI Intern - Match Score 89% Recommendations are based on: • Skills • Resume Content • Interests • Previous Applications • ATS Score • Career Preferences

Job Search

Candidates can search and filter jobs using: • Location • Skills • Salary Range • Experience Level • Remote Jobs • Hybrid Jobs • On-site Jobs The system provides intelligent filtering and recommendations.

Application Tracking

Candidates can track every application through the recruitment lifecycle. Application Status: Applied → Under Review → Shortlisted → Interview → Selected The dashboard displays real-time status updates.

Interview Center

The Interview Center contains: • Upcoming Interviews • Interview History • Meeting Links • Recruiter Feedback • Interview Status Candidates can access interview information from a single dashboard.

Interview Slot Booking

When recruiters open interview slots, shortlisted candidates receive notifications. The notification includes: • Job Name • Available Dates • Available Time Slots Candidates can select a convenient time slot within the recruiter-defined range. The system automatically updates slot availability and

prevents duplicate bookings.

Skill Gap Analysis AI

The AI compares candidate skills against job requirements. Example: Python ✓ SQL ✓ React ✗ AWS ✗ Recommended Learning Path: • React Basics • React Projects • AWS Fundamentals • Cloud Deployment Basics This feature helps candidates understand what skills they should learn to improve employability.

Notification Center

Candidates receive notifications for: • Job Matches • Application Updates • Interview Reminders • Recruiter Messages • Admin Announcements • Skill Recommendations • New Opportunities

Messaging System

Every candidate has a built-in messaging system. Candidates can: • Message Recruiters • Message Admin • Receive Replies • Track Conversations • Share Questions and Concerns Recruiters can communicate with candidates directly through the platform. Admin can communicate with all candidates whenever necessary.

Automatic Welcome Message

Immediately after the first login, every candidate receives an automatic welcome message from the Skillora Admin Team. Example: Welcome to Skillora! We are excited to help you discover opportunities, improve your skills, and advance your career. Important Safety Notice: Skillora never supports illegal payments for jobs. If any recruiter asks you for money, gifts, fees, deposits, or any financial payment during the recruitment process, immediately report the recruiter. Please send: • Recruiter Details • Screenshots • Email Evidence • Chat Evidence The Skillora team will investigate the issue. We wish you success in your career journey.

Candidate Workflow

1. Candidate Registers.
2. Candidate Creates Profile.
3. Resume Uploaded.
4. AI Generates ATS Score.
